

## Young Scientist Awards BTE 2020

Amir Neshatfar

email: [amirneshtafar98@email.com](mailto:amirneshtafar98@email.com)

[BTE 2020 Conference Committees](#) glad to announce International Conference on Biomaterials for Bone Tissue Engineering during September 28-29, 2020 in Abu Dhabi, UAE. BTE 2020 developments are maintaining their momentum. Bone Tissue Engineering Conference program delves into strategic discussions.

Bone Tissue Engineering is the understanding of tissue formation, bone fractures, [bone structures](#), bone mechanics, as it aims to motivate new functional bone tissues. It is also explained in the words, successfully knowledge of bone biology, regenerate or repair bone and its development quite essential. Bone defect and bone regeneration are also under goes the bone tissue engineering. Lack of bone is called as a bone defect. Since bone defect arises from trauma for the treatment of osteomyelitis, this will be accompanying major tissue injury. The goal of tissue engineering is improve damaged tissues or whole organs.

### **BTE 2020 Young Scientist Awards:**

[BTE Conference Committees](#) intended to honor prestigious award for talented Young researchers, scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, junior faculty in recognition of their outstanding contribution towards the conference theme. The Young Scientist Awards make every effort in providing a strong professional development opportunity for early career academicians by meeting experts to exchange and share their experiences on all aspects of Bone Tissue Engineering.

BTE 2020 is a place where you can explore your ideas across the globe. Currently biomaterials are facing so much challenge in the field of medicine. To overcome this challenge BTE2020 is the ultimate platform to share the innovative ideology in the biomaterials and Bone tissue engineering. Here you can meet experienced professors from different universities, world class scientists, industrial experts, Decision makers, defined eminent in biomaterial and stem cell business.

BTE2020 is a great platform for building a gap between academia and industry through innovative decisions in research methods in Biomaterial science. Biomaterials and Bone tissue engineering are showing a steady growth not only in the field of medicine but also in the field of engineering and material science.

Biomaterials are used from ancient situations for social insurance applications. In any case, the consequent growth made them more versatile and improved their usefulness. Biomaterials have developed territories such as [bioengineering](#) and tissue designed to promote new methodologies in the fight against harmful infections.

In fact, emerging microorganism technology is being used in combination with [biomaterials](#) to improve the new offices of human services. After a superior and a reasonable social security, the presentation of nano materials again transforms into a huge quest.

This imaginative conference talk about the bearings of Biomaterial and Bone tissue building with progressed therapeutic and Biomaterial pharmaceutical in this quick moving and creating science and innovation. BTE2020 takes benefit and feels respect to entire heartedly inviting you all for Worldwide Conference on Biomaterials for Bone Tissue Building amid September 28-29, 2020 at Abu Dhabi, UAE gives the scope for openings to memorize around most recent advances, restorative bones and primarily centers on spreading the mindfulness almost how to avoid Stem cells diseases and different. This scientific session offers a great platform with its well defined scientific sessions to the audience to share and express their innovative ideas on topics like biomaterials, biomaterials in stem cell technology, biomaterials and nanotechnology, Tissue Engineering, Stem Cells, Biosensor, cardiovascular biomaterials, Dental Biomaterials, Biopolymers, Biomarkers, Bio photonics, Regeneration & Therapeutics, Reprogramming Stem Cells: Computational Biology, 3D-bioprinting, Bioengineering and Bioprocessing and much more.

Building, Stem Cells, Biosensor, cardiovascular biomaterials, Dental Biomaterials. Young Research's Awards at BTE 2020 for the Nomination: Young Researcher Forum - Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation, only 25 presentations acceptable at the BTE 2020 young research forum

### **Benefits:**

- Young Scientist Award recognition certificate and memento to the winners
- Our conferences provide best Platform for your research through oral presentations.
- Learn about career improvement with all the latest technologies by networking.
- Young Scientists will get appropriate and timely information by this Forum.
- Platform for collaboration among young researchers for better development.
- Provide an opportunity for research interaction and established senior investigators across the globe in the field
- Share the ideas with both eminent researchers and mentors.
- It's a great privilege for young researchers to learn about the research areas for expanding their research knowledge.

**Eligibility:**

- Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty with a minimum of 5 years of research experience
- Presentation must be into scientific sessions of the conference.
- Each Young Researcher / Young Scientist can submit only one paper (as first author or co-author).

- Age limit- Under 35yrs
- All submissions must be in English.

BTE 2020 provides best platform to expand your network, where you can meet scientists, authorities and CROs from around the world. It's your time to grab the opportunity to join BTE 2020 for promoting your research article and to facilitate prestigious award in all categories. In this fame, we look forward for your contribution and astonishing dedication to make our BTE 2020 more successful.
